

Kathleen Hogan

Director

Climate Protection Partnerships Division

U.S. Environmental Protection Agency

Kathleen Hogan is the Director of the Climate Protection Partnerships Division of the US Environmental Protection Agency. There she manages many of the Agency's industry partnership programs designed to remove market barriers and reduce greenhouse gas emissions while saving businesses and consumers money.

These programs include the EPA's flagship voluntary program, ENERGY STAR, which offers energy efficiency solutions across the residential, commercial and industrial sectors: partnership programs to promote renewable energy and combined heat and power; Climate Leaders, a corporate leadership program for addressing climate change; and a State partnership designed to promote clean energy policies with state decision-makers.

Hogan has been with the EPA for 15 years. Prior to EPA, she worked in consulting and for a water resources planning commission for the Potomac River. She received her doctorate in systems analysis and environmental engineering from the Johns Hopkins University and a Bachelor of Science in Chemistry from Bucknell University.
